MEI Information

Critical Item Info

Failure Factors

Consumption Factors

- *Scenario Analysis within 4 hours*
- *Coverage of all DLA Commodities*
- *Resident on GCSS*
- *Interact with Service Models and Data*

\* Or Force Deployment Module

# Status

- **Full Operational Capability for:**
  - Bulk Fuel
  - Subsistence
  - Fuels Deployment Modeling
  - Chemical Warfare Defense Equipment
- **In Redevelopment**
  - Critical Repair Parts
  - Component Repair Parts
- **New Development**
  - Class II

# Real World Uses

- **ICIS Used To Generate Fuel Requirements For Desert Fox**
- **ICIS Asked to Come To USAFE At Day 60 To Provide Fuel Requirements Support For Kosovo**
- **Used By DESC & DLA In Support Of Current War On Terrorism**
- **Used In Subsistence and Industrial Base Planning**

# ICIS Version 5.0

- **Oracle Based System**
  - Standard And Adhoc Reports
  - Faster Processing
- **More Electronic Linkage To Data Sources**
- **Interoperability With GCSS/DII-COE**
- **Provide Capability To Edit/Change:**
  - Major End Item OPTEMPOs
  - Composition Of Units
  - Meal Plans
- **Ability To Move Troops**

# Summary

- **ICIS Currently in use by Combatant Commanders, Services, DLA**
- **Used in “Real World” and Exercise Scenarios**
- **Reengineering ICIS to Make ICIS Better**
  - **More User Friendly**
  - **More Feedback**
  - **Establish IPT with the Centers**
  - **Class IX Expansion**
- **Exploring Ties to other DoD Systems**
